as the might and capabilities of american airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians in bombs cities and civilians conrad crane maintains that for the most part american airmen in world war ii remained committed to precision bombing doctrine instead of attacking densely populated urban areas simply to erode civilian morale army air forces adhered to a policy that emphasised targeting key industrial and military sites he demonstates that while the british germans and japanese routinely conducted indiscriminate aerial bombardment of enemy cities american airmen consistently stayed with daylight raids against carefully selected targets especially in europe daytime precision missions were usually far more dangerous than night area attacks but such army air forces tactics increased bombing efficiency and also reduced the risk of civilian casualties

adolf hitler had high hopes for his conquest of norway which held both great symbolic and great strategic value for the fuhrer despite early successes however his ambitious northern campaign foundered and ultimately failed adam claasen for the first time reveals the full story of this neglected episode and shows how it helped doom the third reich to defeat hitler and raeder the chief of the german navy were determined to take and keep norway by doing so they hoped to preempt allied attempts to outflank germany protect sea lanes for german ships access precious scandinavian minerals for war production and provide a launchpad for luftwaffe and naval operations against great britain beyond those strategic objectives hitler also envisioned norway as part of a pan nordic stronghold a centerpiece of his new world order but as claasen shows hitler s grand expectations were never realized gring s luftwaffe was the vital spearhead in the invasion of norway which marked a number of wartime firsts among other things it involved the first large scale aerial operations over sea rather than land the first time operational objectives and logistical needs were fulfilled by air power and the first deployment of paratroopers although it got off to a promising start the german effort particularly against british and arctic convoys was greatly

hampered by flawed strategic thinking interservice rivalries between the luftwaffe and navy the failure to develop a long range heavy bomber the diversion of planes and personnel to shore up the german war effort elsewhere and the northern theater s harsh climate and terrain claassen s study covers every aspect of this ill fated campaign from the 1940 invasion until war s end and shows how it was eventually relegated to a backwater status as germany fought to survive in an increasingly unwinnable war his compelling account sharpens our picture of the german air force and widens our understanding of the third reich s way of war
